OVERVIEW

Welcome to Astronomia Token BSC, ASTRON.

Astronomia Token BSC (ASTRON) is a 100% Community driven & fair launch token. The Dev Team burnt 50% of the total supply to the black hole into a dead address.

Automatic LP gives that every trade contributes toward automatically generating liquidity locked inside PancakeSwap LP.

50% Total Supply were burned & Liquidity Pool is locked forever.

100% Community-driven.

WHAT IS ASTRONOMIA

A self-staking and Fair Launched token which is driven by the community.

Created in May 2021 on the Binance Smart Chain network, Astronomia Token BSC is a Defi project, so it is decentralized finance, community-driven project (100%).

We set 3% of every transaction to be distributed to all ASTRON holders. Bigger quantities will bring better profits.

Automatic LP gives every trade contributes toward automatically generating liquidity locked inside PancakeSwap LP.

Astronomia project initially is a DeFi project created on the Binance Smart Chain Network. Nevertheless the project itself gathers two very popular blockchain features as non-fungible tokens (NFTs) and decentralized finance (DeFi) which have seen a huge explosion in growth in the last year particularly and at Astronomia, we will get

in-depth of both and develop great tools for both ecosystems to be at the forefront of space-related BSC tools and NFT.

TOKENOMICS

3% ADDING LIQUIDITY

3% REFLECTION

50% BURNING DOWN

LIQUIDITY ACCUMULATION

The liquidity pool fee on sell trades is locked forever by the smart contract.

REFLECTION

Fee redistributed to all holders, black hole included.

BURNING DOWN

50% burned to the black hole.

FEES

We are talking about a minimal quantity. ASTRON tokens on Pancake swap v2 with 1 BNB as initial liquidity and locked forever.

TRANSACTIONS

For every transaction, we have set 3% to distribute to all ASTRON holders. Bigger quantities will bring better profits.

MISSION

Astronomia's goal is to go beyond the moon to outer space and getting enough holders to release the NFTs we are working on, then we will reward each holder with nice ASTRON NFTs. Our DEV team is developing great tools that will make a difference with other BSC ecosystem tokens.

WHAT

Astronomia has been in development for more than we initially expected because we have implemented an advanced smart-contract system that allows the holders to earn more by every transaction.

After two rounds of testing and after an unsuccessful first launch failure ASTRON demonstrated its readiness to face the masses and to outer space.

WHY

Astronomia Token BSC exists due to our frustration in all scam tokens that have emerged on the Binance Smart Chain and the last thing we want is to become just another one.
